

New Component/Supplier Risk Tool

Disclaimer – This tool is not recommended to replace an MRA nor to perform an overall risk assessment. This tool was developed for use in advance of a system-level or product-level MRA. The tool is an additional methodology to help select which suppliers, processes, and components to perform an MRA to effectively allocate program resources. NOTE – this tool is not being recommended as the only way to decided where to do an MRA but has been found to be effective in stimulating conversations about where to perform an MRA. This tool is intended to supplement the well-established MRA/MRL process; it is **not** a substitute for that process.
